 Final Interim Remedial Action Design Package  
 In-Situ Air Sparging Groundwater Treatment System  
 Operable Unit No. 10 (Site 35) Camp Geiger Area Fuel Farm  
 Marine Corps Base, Camp Lejeune, North Carolina

Dear Ms. Landman:

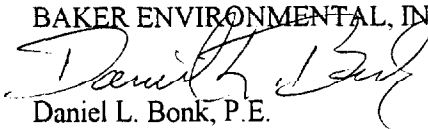

Baker Environmental, Inc. (Baker) is pleased to submit five sets (including two bound and three unbound) of the Final Interim Remedial Action Design Package for the implementation of an In-Situ Air Sparging Groundwater Treatment System at Operable Unit (OU) No. 10 (Site 35) Camp Geiger Area Fuel Farm. This package includes design plans, performance-based specifications, and a Final Basis of Design Report which contains a construction cost estimate. According to the project schedule this deliverable was to be submitted on May 19, 1997. It was not submitted on that date due to late reviewer comments. Others receiving this design package include Messers. Neal Paul (two sets) and Brent Rowse (one set) at Camp Lejeune, USEPA (four sets), NC DEHNR (four sets), and Mr. Jim Dunn of OHM Remediation Services Corporation (three sets excluding the construction cost estimate). Included with the package sent to OHM was a computer disk containing the CADD files for the design plans.

Baker's responses to comments to the previous version of this design package (i.e., the 100% Design) provided by USEPA, NC DEHNR, and OHM have been forwarded to you via e-mail. Prior to modifying the design package, Baker discussed the comments with Ms. Gena Townsend of USEPA, Mr. Dave Lown of NC DEHNR, and Mr. Jim Dunn of OHM. In each case Baker received verbal concurrence for our responses.

Baker appreciates the continued opportunity to serve you on this project. If you have any questions regarding this submittal, please contact me at (412) 269-2063 or Mr. Matthew D. Bartman, Baker Activity Coordinator, at (412) 269-2053.

Sincerely,

BAKER ENVIRONMENTAL, INC.
