Incident No. 32452
Risk Classification: Low

Dear Dr. Arnold:

On December 28, 2007, the UST Section received a copy of the subject report in which soil samples were collected from 35 locations along the former piping run. Some of the samples analyzed had concentrations of total petroleum hydrocarbons (TPH) detected above the action level. The recommendation in the report was to re-sample the non-compliant locations using the risk-based analyses. The Division suggests that only SB11 and SB24 be re-sampled. The Division also requests that the Base collect water samples at these two locations to determine if groundwater has been impacted at this incident site. Please submit a report concerning the above work by June 6, 2008.

Thank you for your attention to this matter. If you have any questions concerning this letter, please contact me at (910) 796-7400.

Sincerely,

Bruce Reed
