RE: Notice of No Further Action
15A NCAC 2L.0115(h)
Risk-based Assessment and Corrective Action for Petroleum USTs
USMC- Camp Lejeune-Bldg. AS-2804 (new)
Incident No. 32011
Camp Lejeune, Onslow County

Dear Ms. Hall:

On November 26, 2002, the UST Section, Division of Waste Management, Wilmington Regional Office received a Underground Storage Tank Closure Report for the above referenced site. A review of this report shows that soil contamination does not exceed the residential or soil-to-groundwater maximum soil contaminant concentrations established in 15A NCAC 2L .0115(m), whichever are lower. A review of this report also shows that contaminated groundwater does not exceed the groundwater quality standards established in 15A NCAC 2L .0202. Based on information provided to date, the UST Section classifies the risk posed by the discharge or release as low risk and determines that no further action is required for this incident. This determination shall apply unless the UST Section later determines that the discharge or release poses an unacceptable risk or a potentially unacceptable risk to human health or the environment.

Pursuant to 15A NCAC 2L .0115(e), the USMC has a continuing obligation to notify the UST Section of any changes that it knows of or should know of, that might affect the level of risk assigned to the discharge or release. If you have any questions concerning this letter, please contact Bruce Reed at (910) 395-3900.

Sincerely,

David R. Holsinger, P.E.
Regional Supervisor
