Subject: Review of Report Entitled
"Annual Groundwater Monitoring
Report, Building BB-190"
Incident No. 22793
Horn Road, Camp Lejeune
Onslow County

Dear Mr. Burton:

Thank you for submitting the subject report to the Division on June 30, 2009. The Division has reviewed the report and offers the following comments and/or concerns:

- The recommendations in the report are satisfactory, including the recommendation for the addition of the iSOC units. Please install the iSOC units as soon as possible.

If there are any questions concerning this letter, please call me at (910) 796-7400.

Regards,

Bruce Reed

Subject: Review of Annual Monitoring
Report and Request for No
Further Action Status
USMC-Camp Lejeune, Bldg. 190-1
Incident No. 22793

Dear Ms. Hall:

Thank you for submitting the subject report to the Division on June 12, 2002. The Division has reviewed the report and offers the following comments:

- Contaminant concentrations detected in groundwater samples are over 2L standards, and a water supply well is located on site about 80 feet away from a former UST. The deep aquifer in this area is under a semi-confined to unconfined condition. The Division cannot issue a No Further Action letter at this time due to language in the letter concerning use of groundwater at contaminated sites. Therefore, it is recommended that the USMC continue to monitor groundwater conditions on at least an annual basis until levels are consistently below 2L standards, or properly abandon the on site well and submit a well abandonment record to the Division.

If you have any questions concerning this letter, please call me or Dave Holsinger at (910) 395-3900.

Sincerely,

Bruce Reed
Hydrogeologist II
