RE: Notice of No Further Action
15A NCAC 2L .0115(h)
Risk-based Assessment and Corrective Action for
Petroleum Underground Storage Tanks
USMC-Camp Lejeune, Bldg. RC-270-1
Gonzalez Blvd., Camp Lejeune, Onslow County
Incident No. 24223

Dear Ms. Hall:

On February 24, 2003, the Underground Storage Tank (UST) Section, Division of Waste Management (DWM) Wilmington Regional Office received a UST Closure Report for the above-referenced site. A review of the report shows that soil contamination does not exceed the residential or soil-to-groundwater maximum soil contaminant concentrations established in 15A NCAC 2L .0115(m), whichever are lower. Based on information provided to date, the UST Section classifies the risk posed by the discharge or release as low risk and determines that no further action is required for this incident. This determination shall apply unless the UST Section later determines that the discharge or release poses an unacceptable risk or a potentially unacceptable risk to human health or the environment.

This no further action determination only applies to the above-referenced incident and that for any other incidents, the responsible party is expected to continue to address the contamination as required by the applicable rules and in accordance with any previously issued notices.

Ms. Nikki Hall

Pursuant to 15A NCAC 2L .0115(e), the USMC has a continuing obligation to notify the UST Section of any changes that it knows of or should know of, that might affect the level of risk assigned to the discharge or release.

Should the USMC have any questions, please contact Bruce Reed at (910) 395-3900.

Sincerely,
