Subject: Review of UST Closure Report
USMC-Camp Lejeune, LCH-4034
Camp Lejeune, Onslow County
Incident No. 24255

Dear Ms. Hall:

Thank you for submitting the subject report to the Division on January 27, 2003. The Division has reviewed the report and has talked to you, Mr. Bruce Markwick, and the Groundwater Section about the product that was found in the former line area. The conclusions and recommendations found in the report are acceptable to the Division. It is understood that the USMC desires to pursue the assessment and remedial action of the product discovery under the cleanup presently occurring at the site for AST system releases that have occurred just upgradient of this area. This is acceptable to both the UST Section and the Groundwater Section. If further assessment information concludes that the product originated from an UST system, please inform me immediately.

If you have any questions concerning this letter, please contact me at (910) 395-3900.

Sincerely,
