Re: Notice of Regulatory Requirements
15A NCAC 2L .0407(d)
Risk-based Assessment and Corrective Action
for Petroleum Underground Storage Tanks

USMC-Camp Lejeune, Bldg. FC-201E
Main Service Road
Camp Lejeune, Onslow County
Incident Number: 23741
Risk Classification: Low
Ranking: LOR

Dear Mr. Smith:

The Annual Groundwater Monitoring Report received by the UST Section, Wilmington Regional Office on June 30, 2006 has been reviewed. The risk posed by the discharge or release at the subject site is reclassified by the Department as low, as stipulated under Title 15A NCAC 2L .0406. The land use at the site is classified as industrial/commercial. Title 15A NCAC 2L .0407(a) requires the USMC to notify the Department of any changes that might affect the risk or land use classifications that have been assigned.

Title 15A NCAC 2L .0407(d) requires the USMC to comply with soil assessment and cleanup requirements of Title 15A NCAC 2L .0408.

A Soil Cleanup Plan (SCP) prepared in accordance with these requirements and the most recent version of the *UST Section Guidelines for Assessment and Corrective Action* which proposes a plan and a schedule for the remediation of soil to the industrial commercial MSCCs must be received by this office within 60 days of the date of this letter. If the SCP proposes to cleanup soil to or leave in-place soil at concentration levels which exceed the lower of the soil-to-groundwater or residential Maximum Soil Contaminant Concentrations (MSCCs) established in Title 15A NCAC 2L .0411, the USMC must give public notice in accordance with 15A NCAC 2L .0409(a) concurrent with the submittal of the SCP.

Failure to comply with the State's rules in the manner and time specified, may result in the assessment of civil penalties and /or the use of other enforcement mechanisms.

Effective October 1, 2004, the Department requires that all work following the submittal of the Limited Site Assessment Report (Title 15A NCAC 2L .0405) be preapproved if State Trust Fund reimbursement is anticipated. To comply with this requirement, a completed Preapproval/Claim Authorization Form, encompassing the required remedial activities, must be received in this office within 14 days of the date of this letter. Upon completion of the preapproved activities, you should submit your claim promptly. Reimbursement funds are budgeted based on completed preapprovals, but lengthy delays in reimbursement can occur if claims are not submitted immediately following work completion.

Because a release or discharge has been confirmed, a Licensed Geologist or a Professional Engineer, certified by the State of North Carolina, is required to prepare and certify all reports submitted to the Department in accordance with Title 15A NCAC 2L .0103(e) and 2L .0111(b).

If there are any questions regarding trust fund eligibility or reimbursement from the Commercial or Noncommercial Leaking Petroleum Underground Storage Tank Cleanup Funds, please contact the UST Section Trust Fund Branch at (919) 733-8486. If there are any questions regarding the actions that must be taken or the rules mentioned in this letter, please contact me at the address or telephone number listed below.

Sincerely,

Bruce Reed
Hydrogeologist II
