Subject: USMC- Camp Lejeune, SBB-94
Courthouse Bay
Camp Lejeune, Onslow County
Incident Number: pending

Dear Mr. Warren:

On December 31, 1998, the Division of Waste Management received a report entitled "Limited Site Assessment" for the above referenced site (please note that this is the title of the report but the report is not complete as a *Limited Site Assessment Report* in accordance with NCAC 2L .0115 (c)4). According to the report, the total petroleum hydrocarbon (TPH) levels as analyzed in the soil samples collected during the installation of a monitoring well were below detection levels. The report also indicated that the groundwater sample, which was collected and submitted for laboratory analyses, contained no constituents in excess of the 15A NCAC 2L action levels. Since there is no evidence of soil or groundwater contamination above action levels, no further action is required at this time.

Should you have questions concerning this letter or require additional information, please call Patricia Coughlan at (910) 395-3900.

Sincerely,

Kirk McDonald
Team Leader
