Re: Notice of No Further Action
15A NCAC 2L .0407(d)
Risk-based Assessment and Corrective Action
for Petroleum Underground Storage Tanks

USMC-Camp Lejeune, Bldg. TC-912-1,2,3,4,5
A Street, Camp Lejeune
Jacksonville, Onslow County
Incident Number: 15198
Ranking: Low

Dear Dr. Arnold:

The Report of Findings with Site Closure Report received by the Underground Storage Tank (UST) Section, Wilmington Regional Office on November 20, 2007 has been reviewed. The review indicates that soil contamination does not exceed the residential maximum soil contaminant concentrations (MSCCs), established in Title 15A NCAC 2L .0411 and that contaminated groundwater has been cleaned up to the level of the standards or interim standards established in Title 15A NCAC 2L.0202.

The UST Section determines that no further action is warranted for this incident. This determination shall apply unless the UST Section later finds that the discharge or release poses an unacceptable risk or a potentially unacceptable risk to human health or the environment. Pursuant to Title 15A NCAC 2L .0407(a) the USMC has a continuing obligation to notify the Department of any changes that might affect the risk or land use classifications that have been assigned.

If soil contamination exceeds the lower of the soil-to-groundwater or residential MSCCs, public notice in accordance with 15A NCAC 2L .0409(b) is required. Thus, within 30 days of receipt of this letter, a copy of the letter must be provided by certified mail, or by posting in a prominent place, if certified mail is impractical, to the local health director, the chief administrative officer of each political jurisdiction in which the contamination occurs, all property owners and occupants within or contiguous to the area containing contamination, and all property owners and occupants within or contiguous to the area where the contamination is expected to migrate. Within 60 days of receiving this no further action letter

this office must be provided with proof of receipt of the copy of the letter or of refusal by the addressee to accept delivery of the copy of the letter or with a description of the manner in which the letter was posted.

This No Further Action determination applies only to the subject incident; for any other incidents at the subject site, the responsible party must continue to address contamination as required.

If you have any questions regarding this notice, please contact me at the address or telephone number listed below.

Sincerely,

Bruce Reed

Incident No. 15198
Low Risk Classification

Dear Mr. Burton:

Thank you for submitting the subject report to the Division on March 5, 2004. The Division has reviewed the report and offers the following comments:

The statement on Page 4-4 is not correct. Well head protection areas are in the coastal plain region of North Carolina. Please see Page 4-12 and 4-13 of our Guidelines document for further information.

The Division has not been able to locate sampling information from the area of former dispensing operations at this site. Please inform the Division where the dispensers were located. If soil sampling has not been performed at the dispenser area, it is recommended that this assessment be conducted immediately. Please submit this information to the Division by June 15, 2004.

Thank you for your attention to this matter. If you have any questions concerning this letter, please call me at (910) 395-3900.

Sincerely,

Bruce Reed
