Re: Notice of Regulatory Requirements
15A NCAC 2L .0405
Risk-based Assessment and Corrective Action
for Petroleum Underground Storage Tanks

USMC Camp Lejeune Bldg. TT-2103
Tarawa Boulevard, Camp Lejeune
Onslow County
Incident number: 32603
Risk Classification: Undetermined
Ranking: TBD

Dear Mr. Schultz:

The Initial Abatement Action Report received by the UST Section, Wilmington Regional Office on January 6, 2010 has been reviewed. The report indicates that soil contamination exceeds the action level, the lower of the residential or soil-to-groundwater maximum soil contaminant concentrations (MSCCs) established in Title 15A NCAC 2L .0411), and/or that groundwater contamination exceeds the standards or interim standards established in Title 15A NCAC 2L.0202. Therefore, the UST Section hereby confirms that Camp Lejeune must comply with assessment and reporting requirements of Title 15A NCAC 2L .0405, within the timeframes specified in the attached rule.

The requirements of Title 15A NCAC 2L .0405 include the preparation and submittal of a Limited Site Assessment (LSA) Report, in accordance with the rule and the most recent version of the *Guidelines for Assessment and Corrective Action for UST Releases*, within 120 days of discovery of the release. Please note that the deadline has been extended by the Division, in response to a Camp Lejeune request, to September 29, 2009.

Because a release or discharge has been confirmed, a Licensed Geologist or a Professional Engineer, certified by the State of North Carolina, is required to prepare and certify all reports submitted to the Department in accordance with Title 15A NCAC 2L .0103(e) and 2L .0111(b).

Please note that before you sell, transfer, or request a "No Further Action" determination for a property that has not been remediated to below "unrestricted use" standards, you must file a Notice of Residual Petroleum ("Notice") with the Register of Deeds in the county where the property is located (NCGS 143B-279.9 and 143B-279.11).

Failure to comply with the State's rules in the manner and time specified may result in the assessment of civil penalties and/or the use of other enforcement mechanisms.

If there are any questions regarding trust fund eligibility or reimbursement from the Commercial or Noncommercial Leaking Petroleum Underground Storage Tank Cleanup Funds, please contact the UST Section Trust Fund Branch at (919) 733-8486. If there are any questions regarding the actions that must be taken or the rules mentioned in this letter, please contact me at the address or telephone number listed below.

Sincerely,

Bruce Reed
Hydrogeologist II
Wilmington Regional Office
