Re: Notice of No Further Action
15A NCAC 2L .0407(d)
Risk-based Assessment and Corrective Action
for Petroleum Underground Storage Tanks

USMC-Camp Lejeune, Bldg. TT-2929
Saipan Drive, Camp Lejeune
Onslow County
Incident Number: 32570
Risk Classification: Low

Dear Mr. Schultz:

The UST Closure Report Addendum received by the Underground Storage Tank (UST) Section, Wilmington Regional Office on January 14, 2010 has been reviewed. The review indicates that soil contamination does not exceed the soil-to-groundwater maximum soil contaminant concentrations (MSCCs), established in Title 15A NCAC 2L .0411.

The UST Section determines that no further action is warranted for this incident. This determination shall apply unless the UST Section later finds that the discharge or release poses an unacceptable risk or a potentially unacceptable risk to human health or the environment. Pursuant to Title 15A NCAC 2L .0407(a) the USMC has a continuing obligation to notify the Department of any changes that might affect the risk or land use classifications that have been assigned.

This No Further Action determination applies only to the subject incident; for any other incidents at the subject site, the responsible party must continue to address contamination as required.

North Carolina Department of Environment and Natural Resources

Re: Notice of Regulatory Requirements
15A NCAC 2L .0405
Risk-based Assessment and Corrective Action
for Petroleum Underground Storage Tanks

USMC Camp Lejeune Bldg. TT-2929
Saipan Drive, Camp Lejeune
Onslow County
Incident number: 32570
Risk Classification: Undetermined
Ranking: TBD

Dear Mr. Burton:

The Underground Storage Tank Closure Report received by the UST Section, Wilmington Regional Office on August 10, 2009 has been reviewed. The report indicates that soil contamination exceeds the action level, the lower of the residential or soil-to-groundwater maximum soil contaminant concentrations (MSCCs) established in Title 15A NCAC 2L .0411), and/or that groundwater contamination exceeds the standards or interim standards established in Title 15A NCAC 2L.0202. Therefore, the UST Section hereby confirms that Camp Lejeune must comply with assessment and reporting requirements of Title 15A NCAC 2L .0405, within the timeframes specified in the attached rule.

The requirements of Title 15A NCAC 2L .0405 include the preparation and submittal of a Limited Site Assessment (LSA) Report, in accordance with the rule and the most recent version of the *Guidelines for Assessment and Corrective Action for UST Releases*, within 120 days of discovery of the release. Please note that the deadline has been extended by the Division, in response to a Camp Lejeune request, to September 29, 2009.

Because a release or discharge has been confirmed, a Licensed Geologist or a Professional Engineer, certified by the State of North Carolina, is required to prepare and certify all reports submitted to the Department in accordance with Title 15A NCAC 2L .0103(e) and 2L .0111(b).

Please note that before you sell, transfer, or request a "No Further Action" determination for a property that has not been remediated to below "unrestricted use" standards, you must file a Notice of Residual Petroleum ("Notice") with the Register of Deeds in the county where the property is located (NCGS 143B-279.9 and 143B-279.11).

Failure to comply with the State's rules in the manner and time specified may result in the assessment of civil penalties and/or the use of other enforcement mechanisms.

If there are any questions regarding trust fund eligibility or reimbursement from the Commercial or Noncommercial Leaking Petroleum Underground Storage Tank Cleanup Funds, please contact the UST Section Trust Fund Branch at (919) 733-8486. If there are any questions regarding the actions that must be taken or the rules mentioned in this letter, please contact me at the address or telephone number listed below.

Sincerely,

Bruce Reed
Hydrogeologist II
