Re: Notice of No Further Action  
15A NCAC 2L .0407(d)  
Risk-based Assessment and Corrective Action  
for Petroleum Underground Storage Tanks

USMC-Camp Lejeune, Bldg. TT-3123  
Bougainville Drive, Camp Lejeune  
Onslow County  
Incident Number: 32543  
Risk Classification: Low

Dear Dr. Arnold:

The UST Closure Report received by the Underground Storage Tank (UST) Section, Wilmington Regional Office on April 3, 2009 has been reviewed. The review indicates that soil contamination does not exceed the soil-to-groundwater maximum soil contaminant concentrations (MSCCs), established in Title 15A NCAC 2L .0411. Since the soil contamination was excavated before groundwater was encountered in the excavation, there was no requirement for the groundwater to be tested.

The UST Section determines that no further action is warranted for this incident. This determination shall apply unless the UST Section later finds that the discharge or release poses an unacceptable risk or a potentially unacceptable risk to human health or the environment. Pursuant to Title 15A NCAC 2L .0407(a) the USMC has a continuing obligation to notify the Department of any changes that might affect the risk or land use classifications that have been assigned.

This No Further Action determination applies only to the subject incident; for any other incidents at the subject site, the responsible party must continue to address contamination as required.

If there are any questions regarding this notice, please contact me at the address or telephone number listed below.

Sincerely,

Bruce Reed  
Hydrogeologist II  
Wilmington Regional Office
