Groundwater Section
Attn: Mr. Shiver
127 Cardinal Drive Extension
Wilmington, North Carolina 28405-3845

Dear Mr. Shiver:

This letter acknowledges your phone conversation with Mr. George Radford on January 23, 1992, wherein you discussed the Hadnot Point Fuel Farm pump and treat system operational, sampling, and reporting requirements. As discussed, this system is the first of several to be installed aboard the Base. We appreciate your interest in assisting us to assure that our Scope of Work for operation of this system is acceptable and meets all State of North Carolina requirements.

Please find enclosed a copy of our most recent Scope of Work for your review and comment. We are most interested in your comments regarding sampling parameters, groundwater level recording, free product measurements, reporting requirements, and the frequency for accomplishing each of the aforementioned items. Please note that much of the enclosure is contractual language and requirements under the Federal Acquisition Regulations and does not pertain to your review. Our goal is to provide you with necessary information to adequately manage the site and to minimize our operational expenses wherever possible.

Also find enclosed a copy of the Federal Facilities Agreement for your use. As you are aware, this document mandates many of our requirements for both the Installation Restoration Program and Underground Storage Tank investigation and remediation.

Again, we appreciate your assistance in this matter. If you have questions or comments, please contact Mr. Radford, Installation Restoration Manager, at (919) 451-5093/5094.

Sincerely,

A handwritten signature in cursive script, appearing to read "Robert L. Warren".

ROBERT L. WARREN
Assistant Chief of Staff,
Environmental Management
By direction of the
Commanding General
