MARIETTA ENERGY SYSTEMS, INC.

POST OFFICE BOX P  
OAK RIDGE, TENNESSEE 37831

October 27, 1986

Mr. Anthony Sturtzer  
Naval Energy and Environmental Support Activity  
Code 112N, Bldg 835  
Port Hueneme, California 93043-5014

Dear Mr. Sturtzer:

Martin Marietta Energy Systems has completed its evaluation of Environmental Science and Engineering, Inc. located in Gainesville, Florida. The purpose of this letter is to briefly summarize my findings and to formally submit Energy Systems recommendation to the Navy for approval of ESE under the QA Program.

Energy Systems has reviewed ESE's QA/QC Plan and discussed the laboratory by phone with you. You had stated that past performance samples analyzed and reported to MITRE under another project for the Navy and an audit performed by MITRE resulted in ESE's approval as a Navy laboratory. The above work was performed within the last year and was applicable and acceptable to the current project which is a confirmation study at Camp LeJeune. Based on your recommendation and our discussion with ESE's Laboratory QA Coordinator, William Coulombe, and our review of ESE's QA Plan, Energy Systems recommends that ESE be approved by the Navy to conduct the confirmation study specified in the Camp LeJeune work plan.

If you have any further questions do not hesitate to contact me.

Sincerely,

  
Mitzi Miller
