RE: MCB Camp Lejeune meeting on Site Management Plan

Dear Ms. Boucher:

The Environmental Protection Agency (EPA) wishes to thank NAVFAC for the highly productive meeting at Raleigh, N.C., covering the Site Management Plan (SMP) for MCB Camp Lejeune, N.C. The due date for the submission of the Draft Final SMP to EPA was set as June 15, 1991.

EPA looks forward to working with the Navy on expediting an "Interim Remedial Action" (IRA) for the shallow groundwater plume at the Hadnot Point Industrial Area to minimize further contamination of ground water at that site. EPA will also make a proposal to the Navy for an expedited "IRA"/Removal at Sites 6 (Storage Lots 201 & 203), and/or 69 (Rifle Range Chemical Dump).

EPA wishes to reemphasize to the Navy that aggressive schedules for RI/FS starts, proposed plans, records of decision, and interim RD/RAs, should be presented within the SMP. EPA will work with the Navy to assist you in meeting those schedules. Extensions can be provided in accordance with the Force Majeure and Extensions provisions of the Federal Facility Agreement (Sections XXX & XXIX), as needed.

If you have any questions concerning these matters, please contact Mr. Carl R. Froede Jr. of my staff at (404) 347-3016.

Sincerely yours,

  
James H. Scarbrough, P.E., Chief  
RCRA and Federal Facilities Branch  
Waste Management Division

cc: Mr. Jack Butler, NCDEHNR
