EPA REGION IV RECOMMENDS MCB BE ADDED TO NATIONAL PRIORITY LIST PER SUPERFUND ACT

Ref: (a) AC/S Fac ltr to JPAO 5280/9 dtd 17 Sep 86

1. Per phonecon with Mrs. Cheryl Barnett, NAVFACENCOM (Code 114), EPA Region IV has made subject recommendation to Headquarters, EPA. We have no documentation on this decision following Region IV staff's visit in November.

2. The two biggest impacts if this happens:

a. We must prepare a Community Relations Plan - reference (a) has details.

b. EPA increases oversight of NACIP methods, report reviews, etc.

Both of these impacts will require more attention be given by MCB staff to the NACIP program.

3. Current NACIP milestones remain:

Hadnot Point Characterization Study Report (extent of pollution of groundwater supply)	- June 87
Hadnot Point Feasibility Report (remedial alternatives)	- Fall 87
Ohter NACIP Sites Verification	- Summer 88

4. I have notified JPAO and SJA of EPA's recommendation and will provide follow-up data from CMC and EPA as needed.

Very respectfully,

R. E. ALEXANDER
