

ATLANTIC DIVISION
 NAVAL FACILITIES ENGINEERING COMMAND
 NORFOLK, VIRGINIA 23511

9/23/87
 (Date)

MEMORANDUM

Subj: Official telephone call (incoming) (outgoing)

1. The following transaction was handled by telephone this date concerning the subject indicated:

Name and office of each individual engaged in call) C. Barnett
) B. Gregory, ESE
 Date and hour of call 9/23/87
 Originator of call _____

Call (chargeable) (not chargeable) to appropriated funds.

Subject matter discussed:

ARARs proposed by NC. Bob said 10^{-6} risk levels are only used when exposure is by drinking contaminated H_2O & eating contam. organisms — not applicable here. ESE feels accepting ARARs will set a ^{poor} precedent for all future NC work & is not in accordance w/ EPA guidelines. Options are to: use MCLs or do risk assessment for HP area.

Information or instructions given or received:

Agreed to go w/ MCLs & make a case for these in feas. study cover ltr. to NC.

Checked w/ Brian H. on this — states should be asked at beginning of program for potential ARARs; Navy to select actual ARARs during analysis.

C. Barnett
