Dear Mr. Burger:

As recommended in your letter of November 19, 1992, regarding the notification of the North Carolina Environmental Health Office to discuss the status of water supply well #636, we have contacted Mr. Michael Bell of the Environmental Health Office. According to Mr. Bell, the continued use of this well is acceptable as long as Camp LeJeune continues regular sampling procedures, and the respective samples do not indicate water quality degradation below regulatory levels.

We appreciate your concern and cooperation. If you have questions or comments, please contact Mr. Walter Haven, Installation Restoration Program, at telephone (919) 451-5872.

Sincerely,
