Dear Ms. Berry:

We have reviewed Baker Environmental's 13 May 1993 correspondence directed to you and copied to the NC DEHNR Superfund Section.

The NC Superfund Section concurs with Baker Environmental's recommendation to conclude the Remedial Investigation/Feasibility Study for site 6 and 82. The additional investigation that is required to complete the delineation of the contaminant plume in the deep aquifer can be performed during the remedial design process.

Ms. Berry
