Dear Sir and Madam:

The North Carolina Superfund Section has received and reviewed the subject documents concerning the Interim Remedial Action for the Shallow Aquifer at the Hadnot Point Industrial Area (HPIA). The State has no additional comments at this time on these documents. It is our understanding, as discussed during the Technical Review Committee Meeting on 19 April 1992, that the necessity of the use of carbon adsorption in conjunction with air stripping will be determined during the planned treatability studies, and that the

treated groundwater will be discharged to the Hadnot Point trickling filter wastewater treatment plant. If you have any questions please contact me at (919) 733-2801.

Sincerely,

A handwritten signature in cursive script that reads "Jack Butler".

Jack Butler, Environmental Engineer
Superfund Section
