RE: Marine Corps Base Camp Lejeune NPL Site
Site 2
Jacksonville, North Carolina

Dear Mr. Brant:

EPA has reviewed the document titled "Draft Final Remedial Investigation and Feasibility Study Work Plan for Operable Unit No. 5 (Site 2) and associated documents. The revised documents substantially incorporate EPA comments. The documents are approved.

Please note, however, that in using PVC well construction materials the Navy/Marine Corps assumes any risk associated with possible contamination attributable to well construction materials. Any contaminants detected in the samples collected from these wells will be assumed to occur in the aquifer and will be addressed as such.

If you have any questions or comments, please call me at (404) 347-3016.

Sincerely,

A handwritten signature in black ink that reads "Michelle M. Glenn".

Michelle M. Glenn
Senior Project Manager
