Subj: Record of Decision
Operable Unit 5, Site 2
MCB Camp Lejeune NPL Site
Jacksonville, North Carolina

Dear Sir:

The U.S. Environmental Protection Agency (EPA) Region IV has reviewed the above subject decision document and concurs with the selected remedy for the Remedial Action at Site 2 as supported by the previously completed Remedial Investigation, Feasibility Study and Baseline Risk Assessment Reports.

The selected remedy, Institutional Controls/Long-Term Groundwater Monitoring, is the final action to be conducted at this site. A time critical removal action (TCRA) is presently nearing completion at Site 2. The TCRA was designed to remove pesticide-contaminated soils and sediment identified during the remedial investigation.

This remedial action is protective of human health and the environment, complies with Federal and State requirements that are legally applicable or relevant and appropriate to the remedial action and is cost effective.

Sincerely,

John H. Hankinson, Jr.
John H. Hankinson, Jr.
Regional Administrator
