RE: Final Feasibility Study and Proposed Remedial  
Action Plan for Operable Unit No. 1 (Sites 21, 24,  
and 78), MCB Camp Lejeune.

Dear Ms. Berry:

The referenced documents have been received and reviewed by  
the North Carolina Superfund Section. Our comments are attached.  
Please call me at (919) 733-2801 if you have any questions about  
this.

Sincerely,

*Patrick Watters*

North Carolina Superfund Comments  
Final Feasibility Study and  
Proposed Remedial Action Plan for  
Camp Lejeune Operable Unit 1 (Sites 21, 24, and 78)

Feasibility Study

We have not received a response to our comments on the draft final versions of the FS and PRAP. We compared the final documents to the comments that were made on the draft final versions and felt the following comments were still open.

1. Page ES-13, Table ES-1  
(Originally comment #1 on the Draft Final FS)  
Lead, mercury and nickel are shown in Table 2-20 as "COCs that Exceed the Remediation Levels at OU No. 1". Table ES-1 does not include these contaminants. In addition, neither table includes heptachlor epoxide or cadmium which were both detected above the NC groundwater standards. Please explain why these two tables are different.
  
2. Page 2-4, Section 2.3.1  
(Originally comment #7 on the Draft Final FS)  
This section should include the following North Carolina Solid and Hazardous Waste regulations in the list of ARARs.

North Carolina Hazardous Waste Management Rules - 15A NCAC 13A  
North Carolina Solid Waste Management Rules - 15A NCAC 13B

Proposed Remedial Action Plan

The NC Superfund Section does not have any comments on the Final Proposed Remedial Action Plan.
