Soil Remediation
Operable Unit No. 10 - Site 35

Dear Ms. Landman:

The Environmental Protection Agency (EPA) concurs with the above subject document. However, as per our telephone conversation, the data associated with the contaminated soil located in the former underground storage tank area is inconclusive. Therefore, a section addressing confirmatory sampling for this area should be included in the document. If contamination is identified, this area can be included in the final record of decision.

If you have any questions or comments, please call me at (404) 347-3016 or voice mail, (404) 347-3555, x-6459.

Sincerely,

Gena D. Townsend
