RE: Preliminary Human Health and Ecological Risk
Assessment Conceptual Evaluation Models for
Operable Unit 6, (Sites 36, 43, 44, 86, and 54),
MCB Camp Lejeune.

Dear Mr. Laughmiller:

The referenced documents have been received and reviewed by the North Carolina Superfund Section. Comments on these documents are attached as memos from David Lilley, our Industrial Hygienist to myself. Please call me at (919) 733-2801 x-282 if you have any questions about this.

Sincerely,

Patrick Watters

Patrick Watters

RE: Comments prepared on the Preliminary Human Health Risk Evaluation Model, OU 6 (Sites 36, 43, 44, 86, and 54) MCB, Camp Lejeune

After reviewing the above mentioned document, I offer the following comments:

1. Although a list of chemicals and their locations are listed in the background description for each site, information in this document cannot be used as a substitute for the selection of Chemicals of Potential Concern (COPC) and Exposure Scenarios sections in the risk assessment. It is not possible to determine if the Exposure Scenarios contained within this document are appropriate without reviewing the selection of COPC process.
2. The purpose of this document is unclear. Of the comments the reader made within the last year, only about 5% of them had to do with the methodology. The remaining 95% had to do with the application of the methodology.
