Comments concerning the Draft Remedial Investigation Report Operable Unit No. 11 (Site 7)
Marine Corps Base, Camp Lejeune, North Carolina

Specific Comments

1. Page ES-1, para 5 - The first sentence states: "Site 7, the Tarawa Terrace Dump, is located northeast of the water treatment plant and south . . ." This sentence would be better understood by indicating "waste water treatment plant" as there is more than one water treatment plant in Tarawa Terrace.
2. Page ES-2, para 5 - The last sentence states: "All surface and surface and subsurface soil samples . . ." Correct by deleting "and surface".
3. Page ES-4, para 4 - The second sentence indicates that there are six supply wells within a one-mile radius of Site 7. None of these supply wells are currently operating and they are scheduled for demolition.
4. Page ES-4, para 6 - What are the normal background levels for pesticides in surface and subsurface soils?
5. Figure 1-1 - Change title of figure to Operable Unit 11 Location or something similar. Currently, figure 1-1 and 1-2 have the same title but figure 1-1 does not show operable units other than OU-11. Since OU-11 consists of sites 7 and 80, indicate the location of site 80 on the figure.
6. Figure 1-2 - Sites 44 and 36 need to be reversed on the figure.
