Re: Draft Remedial Action Work Plan for PCB Stockpiled Soils  
at Range A, Harvey Point Defense Testing Activity,  
Hertford, NC

Dear Mr. Watters:

Enclosed please find the Draft Work Plan for the removal of a very limited volume of stockpiled PCB contaminated soils at Range A, Harvey Point Defense Testing Activity (HPDTA). These soils were previously excavated and are currently stockpiled on site. This removal action will consist of loading, transport, and disposal activities only. As this project is very limited in scope and access to the site is limited by a heavy schedule of range activities, we plan to complete this work on the weekend of April 20-21, 1996.

A larger-scale remediation project to address PCB contaminated soils still in place at Range A and two other locations at the activity is the subject of an ongoing investigation. A Draft Site Characterization Report, EE/CA, and Design for this larger-scale removal action is to be submitted to you by May 31, 1996.

Please direct any comments or questions to Ms. Katherine Landman at (804) 322-4818.

Sincerely,

A handwritten signature in cursive script, appearing to read "L. G. Saksvig".

L. G. SAKSVIG, P.E.
