Re: MCB Camp Lejeune, Draft Remedial Investigation
Report, Operable Unit 12 (Site 3)

Dear Mr. Watters:

Enclosed please find Navy/Marine Corps responses to your comments on the subject document. We have not yet received comments on the Draft RI from the Wilmington Regional Office. As agreed to following the submission of the Draft report, these comment responses are being submitted in lieu of a Draft Final RI report. Although we will hold submittal of the Final RI until all outstanding comments are received and addressed, your comments on these responses are requested no later than June 15, 1996. This will allow us to meet the next submittal date for the Final RI report of July 15, 1996.

The Navy/Marine Corps appreciates your continued involvement in this project. Please direct any questions or comments to Ms. Katherine Landman at (804) 322-4818.

Sincerely,

L. G. SAKSVIG, P.E.
Head
Installation Restoration Section
(South)
Environmental Programs Branch
Environmental Quality Division

**Responses to Comments Submitted by North Carolina Department of Environment,
Health and Natural Resources
on the Draft Remedial Investigation Report for CTO - 0274
Operable Unit No. 12 (Site 3)
MCB, Camp Lejeune, North Carolina**

Comment Letter by Mr. Patrick Watters dated March 5, 1995

Responses to Specific Comments

1. Section 1, Table 1-2. The North Carolina Groundwater Standards for fluorene (280 $\mu\text{g/L}$), naphthalene (21 $\mu\text{g/L}$) and phenanthrene (210 $\mu\text{g/L}$) will be included in the table.
2. Section 2.2.3, page 2-6. The section states (on page 2-5) that 34 subsurface soil samples were collected during the Phase II investigation. It also states that 27 of the 34 samples were collected from locations sampled during the Phase I ENSYS field screening investigation. The eighth sentence of the section states that the remaining seven subsurface soil samples were collected from soil borings that were converted into groundwater monitoring wells. All 34 subsurface soil samples were submitted to the laboratory for analysis.
3. Section 4.4.2, page 4-8 through 4-12. The Feasibility Study (FS) will discuss an enlarged area of concern in relation to/with the remedial technologies alternatives. It will also discuss the potential for migration of contaminants from the treatment area, and how this affects the evaluation and final selection of a remedial technology(ies).
