SUBJ: Record of Decision  
Operable Unit 12, Site 3  
MCB Camp Lejeune NPL Site  
Jacksonville, North Carolina

Dear Sir:

The U.S. Environmental Protection Agency (EPA) Region 4 has reviewed the above subject decision document and concurs with the selected remedy for the Remedial Action at Site 3. This remedy is supported by the previously completed Remedial Investigation, Feasibility Study and Baseline Risk Assessment Reports.

The selected remedy consists of excavation and biological treatment of PAH-contaminated subsurface soils and institutional controls designed to prevent future potential exposure. The controls include restricting potable well installation, restrictions for future land use and a groundwater monitoring plan. This remedial action is protective of human health and the environment, complies with Federal and State requirements that are legally applicable or relevant and appropriate to the remedial action and is cost effective.

Sincerely,

A handwritten signature in black ink, appearing to read "Richard D. Green".

Richard D. Green  
Acting Director  
Waste Management Division
