Re: Contract N62470-89-D-4814  
Navy CLEAN, District III  
Contract Task Order (CTO) 0332  
Draft Phase I Treatability Study Report  
Operable Unit No. 14 (Site 69)  
MCB Camp Lejeune, North Carolina

Dear Ms. Landman:

Baker Environmental, Inc. (Baker) is pleased to submit three copies of the Draft Phase I Treatability Study Report for Operable Unit No. 14 (Site 69). This report contains an Executive Summary that provides a brief overview of the treatability study and results. Conclusions are presented in Section 5 of the report and Section 6 presents the recommendations and schedule for continued operation of the KGB and UVB treatment systems.

Copies of this submittal have been forwarded as follows:

- Ms. Gena Townsend USEPA - 4 copies
- Mr. David J. Lown, L.G., P.E. NC DEHNR - 1 copy
- Mr. Rick Shiver - NC DEHNR - 1 copy
- Mr. Arthur Mouberry - NC DEHNR - 1 copy
- Mr. Stephen Tedder - NC DEHNR - 1 copy
- Mr. Neal Paul - MCB Camp Lejeune - 2 copies

This project is scheduled to be discussed at the next partnering meeting scheduled for February 5, 1997. If possible, please provide comments to Baker by February 3, 1997 so that the comments may be reviewed prior to the meeting. It is anticipated that the meeting discussion will focus on the recommendation for the continued operation of the treatment system and the comments received on the Draft Phase I Treatability Study Report.

After the report is reviewed and it is determined how the treatability study will proceed, Baker will send a formal modification request letter documenting the appropriate scope and schedule modifications to CTO 0332. Continued operation of the KGB and UVB systems should not require additional funding since the treatability study is funded to operate into 1998.

A Total Quality Corporation
