12 MAY 1998

Mr. Gregory A. Smith
North Carolina Department of Transportation
Geotechnical Unit
Century Center
1020 Birch Ridge Drive
P.O. Box 25201
Raleigh, North Carolina 27611

Mr. Smith:

Enclosure (1) is an updated map of monitoring wells in Right-of-Way of the US 17 Jacksonville Bypass on Marine Corps Base, Camp Lejeune property (from existing US 17 to Wilson Bay). This is an amended map from the one dated March 8, 1998. Also provided is updated well information in table format as enclosure (2), Existing Wells Within/Adjacent to US Highway 17 Bypass, Sites 35, 36, and 89. These changes are a result of the meeting and walk-through between Mr. Michael Smith, a representative of our environmental contractor Baker Environmental, Inc., and Mr. Jackson Provost, Resident Engineer, North Carolina Department of Transportation (NCDOT), Jacksonville Office, on April 3, 1998 concerning the identification of monitoring wells located within the US Highway 17 Bypass Right-of-Way (ROW) and easements.

Enclosure (1) is a map that highlights the location of Site 36 polychlorinated biphenyl (PCB)-contaminated soil, monitoring wells that need to be surveyed in by the NCDOT, and wells deleted/added from the March 8, 1998 map. Similarly, enclosure (2) reflects changes to the March 8, 1998 table. This new table lists those wells that were added for abandonment and eliminates those that were not found during the walk-through or no longer need abandonment.

Point of contact is Mr. Mick Senus, Installation Restoration Division, Environmental Management Department, at telephone (910) 451-5058.

Sincerely,
Scott A. Brewer

SCOTT A. BREWER, PE
Deputy Assistant Chief of Staff
Environmental Management
By direction of
the Commanding General

- Enclosures:
1. Monitoring Wells in Right-of-Way of US 17 Jacksonville Bypass from existing US 17 to Wilson Bay (Updated April 30, 1998)
 2. Existing Wells Within/Adjacent to US Highway 17 Bypass, Sites 35, 36, and 89
